YES

Description of how circular economy principles are applied

Within our Business Unit Commodity Chemicals, our core business model is to create a closed-loop supply chain for sulphur in various states of matter (pure as solid and liquid, as acid in various qualities and also waste-acid). We run this closed-loop sulphur usage over different industry sectors and connect them. This closed-loop supply chain leads to much less need of sulphur from primary sources (e.g. refining/mining). Also our sulphur products are used in production of sustainable fuels.
